## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:

- Species 1 drawn to inspecting a copy for defect depicted by embodiment page 3 paragraph 8 defined by claims 1-36.
- Species 2, drawn to defect detection and classification system depicted by embodiment page 3 paragraph 9 defined by claims 37-40.

The species are distinct because they are directed to related inventions. That is, each species of the defect inspection are related by disclosure as being used together in processing defects. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e. are mutually exclusive, the inventions are not obvious variants; and the inventions as claimed are either not capable of use together or can have materially different design, mode of operation, function or effect. See MPEP 806.05 (j). In the instant case, species I-III as by claims 1-35 does not overlap in scope, they are mutually exclusive, and have materially different designs and modes of operation (i.e. analysis of residual defect and classify defects).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Art Unit: 2624

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
